

SIN
SCHOOL OF AI

INSTITUTIONAL PROFILE

SIN School of AI

AI education. Student innovation.
Learning with practical purpose.

AN INITIATIVE UNDER

**SIN Education and Technology
Private Limited**

SIN Technologies

FOR SCHOOL PRINCIPALS, INSTITUTIONAL LEADERS
AND EDUCATION AUTHORITIES

SEPTEMBER 2026

01 / OUR PURPOSE

Practical AI education with institutional reach

SIN School of AI is the education and training initiative of **SIN Education and Technology Private Limited**, known as SIN Technologies. Based in Jodhpur, it connects AI learning with guided practice, project mentorship, institutional outreach and student innovation. [1, 2]

What we stand for

Students should be able to understand a concept, apply it to a task and explain the result. Our learning formats bring together AI awareness, creative experimentation, technical skills and the judgment required to evaluate AI-generated work.

Schools

Early exposure and guided learning

Campuses

Applied projects and career awareness

One connected learning journey

SIN Exploration introduces technology on campus. **SIN Innovation Centers** provide a setting for practical learning. **SCORE** extends access through online and distance education. Projects, competitions and internship opportunities help learners take their next step. [1, 3]

Relevant to institutional leaders

A school or college can begin with an awareness session and develop a more sustained programme around its learners, facilities and timetable. The aim is to make student work visible through activities, demonstrations, portfolios and presentations.

02 / MILESTONES

Achievements that demonstrate progress

26

Schools in Cup of Excellence qualifiers

13

Schools advanced to the final hackathon

27

Student project entries in MLVerse

150+

Participants in the online AI masterclass

50+

Students at SIN Exploration, VGU Jaipur

Recognition for the parent organisation

SIN Technologies reports selection among the **Top 10 Startups of Jodhpur** at the WISE Tech India Pitchathon 2026, Jodhpur edition, presented by SPJIMR. The recognition featured the organisation and its Xcellence Board platform. [14]

An expanding record of learning

The completed milestones include the April 2026 online prompt-engineering masterclass, the MLVerse project showcase, AI Unlocked at St. Austin's School, campus Exploration sessions and the September Cup of Excellence finale. [4, 6, 7, 10]

Further startup recognition

SIN's published Exploration profile also reports Best Startup recognition from JIET Group of Institutions and selection among PedalStart's top 25 startups. These are organisation-level achievements. [3]

Figures are organiser-reported and refer to separate initiatives; they are not additive unique-student counts.

03 / SCHOOL OUTREACH

SIN Exploration in Jodhpur schools

Bringing AI awareness, curiosity and practical learning into the school environment.

School	SIN engagement
Sri Aurobindo School	SIN Exploration 2026 engagement
New Modern School	School Exploration session
Great Satyam Academy	SIN Exploration session in Jodhpur
Laxmi Devi Mundra School	SIN Exploration 2026 engagement
St. Austin’s Senior Secondary School	AI Unlocked and innovation-centre activity

Learning that students can participate in

The school outreach format introduces AI through accessible explanations, demonstrations and guided activities. Students are encouraged to ask useful questions, examine outputs and discuss how technology connects with learning and everyday problems.

St Austin’s School milestone

The published AI Unlocked 2026 account documents a practical school session led by Er. Harshvardhan Purohit at the SIN Innovation Center. It focused on giving school-age learners direct exposure to AI tools and building activities. [10]

School-session list confirmed by SIN leadership. Public sources additionally support St. Austin’s and Aurobindo activity. [10, 15]

04 / HIGHER EDUCATION

SIN Exploration across colleges and universities

Campus sessions connect AI awareness with practical creation, agentic workflows and project-oriented learning. The institutional record includes the following colleges and universities. [3, 6, 8; SIN records]

Institution	Engagement
Vivekananda Global University, Jaipur	SIN Exploration 2026; 50+ students
Aishwarya College of Education, Jodhpur	SIN Exploration session on agentic AI
JIET Group of Institutions	Campus sessions and MLVerse mentorship
Lucky Institute of Professional Studies	AI sessions and Cup of Excellence finale venue
Lachoo Memorial College of Science and Technology	Campus session
G D Memorial College	Campus session
MMV / MTMC	Campus session
MBM University	Institutional exploration

VGU Jaipur session highlight

Learners explored AI agents, local models, design and development tools: Hermes Agent, OpenClaw, Ollama, Canva, Bolt, v0, Open Design and OpenAI Codex. RACR and agent frameworks supported discussion of how tools fit into a workflow. [8]

Listed engagements do not by themselves imply a formal academic affiliation. Scope varies by institution.

05 / FLAGSHIP MILESTONE

Cup of Excellence Jodhpur 2026

School teams brought AI, innovation and teamwork to a city-level challenge.

26 schools entered the qualifiers. 13 schools reached the finale. Organised by SIN School of AI and SIN Technologies, the Final Hackathon took place at LIPS on **5 September 2026**, Teachers’ Day. [4]

Winner	BDRKA Senior Secondary School
First runner-up	Mahatma Gandhi Government Senior Secondary School
Third and Best Presentation	Lucky International School

The journey began with Prompt Wars at Gayatri Innovation Center. Deepesh Dhariwal, President of TiE Jodhpur, sponsored the official trophy and awards. LIPS was the finale venue partner, with Yatharth Academy supporting the event as powered-by partner. [4, 5; SIN records]

Photograph: awards presentation from the official Cup of Excellence 2026 event report. [4]

06 / FOUNDER AND LEADERSHIP

Er Harshvardhan Purohit

Founder and CEO, SIN Technologies | Founder and Director, SIN School of AI

Gold Medal 95%

BTech in AI and ML under BTU

MBA in AI and Data Science

PhD in AI

Currently pursuing

Er. Harshvardhan Purohit leads SIN's technology vision, AI training, institutional outreach and student mentorship. He is a BTU Gold Medalist, recognised by the Governor of Rajasthan, and is described in SIN's published profiles as a **PM SHRI National AI Expert**. [7, 10; founder update]

His work includes lead mentorship of MLVerse and co-authorship of the AIFDR paper listed on SSRN. Leadership support includes **Dr. Vinod Purohit, Chairman**, and **Shri Shiv Prakash Bohra, CFO**. [2, 4, 6, 9]

MBA 95% and current PhD in AI status reflect the founder's latest supplied correction for this edition.

07 / INNOVATION CENTRES

Spaces where learning becomes practice

SIN Innovation Centers bring practical technology education into dedicated and institution-linked environments. The model supports AI, machine learning, robotics, immersive technology and no-code learning through mentoring and project activities. [11]

Indrakaur Harikirshna Innovation Center

SIN headquarters and innovation workspace

2A29, near Rangoli Shoppe, 1st Puliya, Jodhpur.

Gayatri Innovation Center

Training and competition venue

First Floor, Plot No. 52, Mahaveerpuram City, behind Fun World, Chopasni, Jodhpur. The centre hosted Cup of Excellence qualifier activity. [5]

St Austin's School Innovation Center

School-based AI learning

A published centre presence and the setting for the AI Unlocked school engagement. [10, 11]

NIMAT

Institution-linked learning activity

SIN's programme records include innovation and training activity, including AI-assisted branding.

A centre model for your institution

A centre collaboration can combine a defined learning track, an agreed mentor schedule, practical assignments and student showcases. Infrastructure and delivery scope are planned with institutional leadership.

Headquarters address and NIMAT activity are organisation-supplied. Centre roles and delivery scope differ by location.

08 / SCORE

Centre for Online and Distance Education

Flexible learning through SIN School of AI.

SCORE extends the SIN School of AI learning ecosystem through online and self-paced formats. It enables learners to continue developing skills beyond a campus event or physical classroom. [1, 12]

Online learning portfolio

Published offerings include Generative AI 101, Branding 101, No Code Web Development with Generative AI, AI Essentials Foundations and Prompt Mastery, and emerging-technology learning. [12]

XR Unlocked

Offered through SCORE and SIN Mixed Reality Studio, this self-paced course introduces VR game building with or without a headset. The practical brief includes interactive objects, target spawning, scoring and timed gameplay. [13; SIN course brief]

Continuity after a campus session

Selected online modules can support follow-up practice, independent enrichment and access for learners who cannot attend a centre. Access, support and completion requirements are agreed for each programme.

SCORE offers skill-development learning; certification and assessment follow the terms of the selected course.

09 / TRAINING PORTFOLIO

From AI foundations to practical creation

Programme	Format	Focus
AI AgentXcelerator	21 days	Agentic AI and practical workflows
Data Science Xcellerator	21 days	Data analytics and applied data science
Generative AI for Leaders	15 days	AI applications for leadership and innovation
Master Branding with Generative AI	30 days	AI-supported brand creation
Corporate Xcelerator	20 hours	Weekend agentic AI learning
AI Intelligence Mastery	30 days	Prompt, context and agentic systems
AGENTVERSE Episode 01	20 days	Generative AI and prompting
SCODE courses	Self-paced	AI foundations, branding, web development and XR

Five-month Agent Xcelerator offering

Three months of training + two months of internship. The programme design includes 12 modules, a 30% theory and 70% practical balance, two hours daily and a maximum cohort of 25 at Gayatri Innovation Center.

Institutional adaptations also include a **30-day agentic AI training proposal** for BBA, BCom, MBA and MCom learners. Programme dates, eligibility and terms are agreed separately.

Published course formats: [1, 13]. Five-month and 30-day formats: SIN programme briefs; these are offerings, not graduate counts.

10 / APPLIED LEARNING

MLVerse and research-led curiosity

MLVerse brings together **27 student-built machine-learning project entries** within the SIN School of AI ecosystem, supported by JIET Universe. It creates a visible record of application building and project presentation. [6]

Student projects with demonstrable outputs

The published showcase includes clustering, segmentation, classification and model-exploration applications. Examples include TrendCluster AI, ClusterVibe, Random Forest applications and Activation Model. Er. Harshvardhan Purohit served as lead instructor and mentor. [6]

AIFDR research

Harshvardhan Purohit and Prateek Vyas are listed as co-authors of **Spatiality in Audio Data Emotional Recognition and Dimensionality Reduction using AIFDR** on SSRN. The paper provides a named reference for SIN's research activity in audio-emotion recognition and dimensionality reduction. [9]

Visual: MLVerse showcase from SIN's official publication. Project entries are not a count of independently validated models.

11 / LEARNER DEVELOPMENT

Internships, mentorship and student leadership

150+

Participants in the student-led online masterclass

15 April

2026 masterclass delivered online

Campus Ambassadors Programme

Student-led coordination helped bring together participants from multiple institutions for the free prompt-engineering masterclass. The session was led by Er. Harshvardhan Purohit and explored prompt structure and AI tools. [7]

Internship and practical work exposure

The School of AI learning experience includes internship opportunities, project-based learning, LMS access and interview preparation. SIN records include internship-completion activity for Guneet Gehlot and Divyanshu Bohra; the public team page also lists an AI Research Intern role. [1, 2; SIN records]

A progression learners can build on

An introductory session can lead into guided practice, a project, documentation and a portfolio presentation. Advanced training or an internship can then add defined responsibilities and mentorship, subject to the relevant programme terms.

Xcellence and career visibility

The newer Agent Xcelerator design proposes a connection with Xcellence for visibility into job opportunities. This supports the wider goal of helping students demonstrate skills through their work; employment outcomes are not guaranteed.

Awareness sessions, training courses and internships are distinct forms of participation.

12 / INSTITUTIONAL COLLABORATION

Bring SIN School of AI to your institution

We invite principals and institutional leaders to develop an engagement with clear learning goals, suitable activities and practical outcomes for their students.

Engagement	Suggested scope
Campus introduction	AI awareness and guided demonstrations
Workshop series	Focused practice with task submissions and feedback
School innovation track	Age-appropriate modules and student projects
Competition preparation	Problem solving, prompt evaluation and teamwork
Innovation centre	Agreed infrastructure, mentoring and learning plan
SCODE extension	Online modules and continued learning access

Plan the programme together

Agree the learner group, batch size, timetable, teacher coordinator, devices, learning outcomes and completion criteria. For school learners, include suitable tool access, responsible data use and permissions for event photography.
